

## In Tuberculosis CAMPS

a part of the regular diet is  
**Scott's Emulsion**

Its highly concentrated nutritive qualities repair waste and create physical resistance faster than disease can destroy. All Druggists.

Scott & Bowne, Bloomfield, N. J. 12-11

## Middlebury Register

It is a job of months to search the caves of New York for the murderers of Rosenthal, the gambler, says the Barre Times, and really the murderers are safer within a mile of the New York city hall than they would be fleeing across the country or to some other country.

The success of the project to build a \$100,000 hotel in St. Johnsbury, a strong no-license town, and the continued stagnation of a similar movement in St. Albans, a strong license city, is as good an argument as a reasonable man would require against the claims of the license advocates and against the inn-keepers' license proposition. —Enoch Standard.

A clock owned by Charles H. Drawbaugh of Camp Hill, Penn., is said to be the only piece of mechanism in the world run by electricity, drawn from the earth. The clock has been running almost continuously since 1870. It stands about six feet high, and its 45-pound pendulum is the motor. This pendulum is suspended on an edge pivot of hardened steel, and is operated by an electromagnet, the wire of which runs into the ground to a depth of about six feet. The wire is connected with metal plates, which are packed in coke—enough to hold moisture—and it is said the timepiece can be run so that it will not gain or lose two seconds in a year.

It is the advertising period for the colleges, as we note by the valuable space given to the announcement that a prospective student is walking from Massachusetts to Valparaiso, Ind., university in order to save money to use during his college course, the item being soon supplemented by the information that a Chicago bartender is planning to enter Princeton university and is being backed by the Princeton club of his city. We shall confidently expect to hear from other "poor boys who became famous" through liberal newspaper space. Since the days of Norwich university's famous "peanut man," the Vermont colleges have been very non-progressive in this new feature of American college activity. Can't Vermont, Middlebury or Norwich take up a little sensation of some sort or other? If worst comes to worst, they might tell a story of a man being sent to college by a poor but honest son, who earned the money to send the aforementioned father to college by picking cobbles out of the road. Anything bizarre will do. —Barre Times.

### The Hot Springs of Arkansas.

The wonderful hot waters of the Hot Springs of Arkansas which have been held by the United States for the benefit of the sick are described in detail in a bulletin just issued by the Department of the Interior entitled "Analyses of the Waters of the Hot Springs of Arkansas." There are 46 of these hot springs, all located on a government reservation that was created in 1832 in order that these curative waters might be free from monopoly and commercial exploitation.

On and adjacent to the reservation are 23 pay bathhouses operated under rules and regulations approved by the Secretary of the Interior. Eleven are on the reservation at the base of Hot Springs mountain, constituting what is known as "Bathhouse Row," and 12 are located at various points in the city. Eleven are in connection with hotels, hospitals, or sanatoria. The water is the same in all, but the prices charged for the baths vary in the different houses in accordance with the equipments and accommodations furnished, the rates being fixed in each instance by the secretary of interior.

The government is represented at the springs by a superintendent and a medical director, both appointed by the secretary of the interior. The superintendent has supervision over all general matters connected with the government's interests, and enforces the rules and regulations of the department. The medical director has charge of sanitation, hydrotherapy, the bathing of patients, the government free bathhouse for the indigent, the instruction and supervision of bath attendants, and the determination as to their fitness for employment.

These hot waters may reasonably be expected to give relief in the following conditions: In gout or rheumatism after the acute or inflammatory stage; in neuralgia when dependent upon gout, rheumatism, malaria, or metallic poisoning; in the early stages of chronic Bright's disease; in catarrhal conditions of the gall bladder; in certain forms of disease of the pelvic organs, and in sterility in women; in chronic malaria

alcoholism, and drug addictions; in many chronic skin diseases; in some forms of anemia; in syphilis; in gonorrheal rheumatism; in toxemias and conditions of defective elimination; and in some forms of cardiovascular disease with increased tension in the blood vessels.

The bulletin just issued contains detailed analyses of the water from all the springs, a geological sketch of the origin of springs, and general information regarding the reservation, the city of Hot Springs, the pay bathhouses, the Army and Navy General Hospital, and the character and action of the waters.

### Little Rules of Health.

Learn the value of water. It is nature's restorer. Bathe daily, and drink water many times daily.

Court the sunlight. A germ is as afraid of the sun as a murderer of a policeman. Shut out light and you shut out health.

Do not overeat. We sigh for a good appetite when most of us should be sighing for a moderate one. Dyspepsia follows close on gorging.

Never dread fresh air. We have outlived the day when a draught was to be shunned. A stuffy room or an indoor life is equally disgraceful.

Don't be lazy. The lazy person lacks energy to keep in good health; if it is too much trouble to exercise, eat properly, even to take proper health precautions.

Don't eat too much meat. That way lies rheumatism, gout and uric acid. One need not be a vegetarian, but remember there are no greater blood purifiers than greens and unstarchy vegetables.

Exercise. You do not expect your brain to keep going without exercise; why ask it of our body? The girl who sits still most of her hours and sleeps all night hunts the doctor.

Don't confound walking with dawdling. A long walk that stirs the blood is health-giving, a long dawdle leaves you tired.

Never ride when you can walk. This is advice that makes for good health.

Don't feel that health lurks in the medicine bottle. There are times for drugs, but many more times when sane living and regard for hygiene count more.

### Railway Business for May.

For the month of May the net operating revenue of the railways declined five and five-tenths per cent. per mile of line as compared with May, 1911, and that for May, 1911, was four and eight-tenths per cent. less than for May, 1910. This is the salient fact of the monthly summary of the Bureau of Railway Economics, compiled from the reports of the railways to the Interstate Commerce Commission, and embracing ninety per cent. of the steam railway mileage of the country.

The total operating revenues were \$226,109,262, an increase of 87 per cent. of line over May, 1911. The operating expenses were \$161,308,677, an increase of \$24.29 per mile of line, while the net operating revenue was \$64,740,585, a decrease of \$17.23 per mile of line. Taxes amounted for the month to \$9,897,301, or \$45 per mile, an increase of nine and two-tenths per cent.

The decrease in net operating revenue was most severe for the Eastern group of railways, amounting to eleven and nine-tenths per cent. For the Southern group it increased four-tenths of one per cent., and for the Western group less than one tenth of one per cent. The aggregate of the net operating revenue for the eleven months of the fiscal year, and also for the five months of the calendar year, when measured per mile of line, shows a decrease in comparison with the corresponding periods of the previous year.

### The Pageant at Saratoga.

Saratoga Springs, New York, is to have a pageant on a large scale the week of August 19th representing the history of the town from the time of the purchase of the Mohawk Indians to the present day. Prominent among the episodes will be the battle of Saratoga, participated in by hundreds of men, representing the English and Hessian troops and their Indian allies and the stalwart patriot soldiers clad in their homespun. Other episodes will be the primitive life of the Mohawk Indians, the Surrender of Burgoyne, the Drama of Saratoga Springs, etc. The pageant will take place in Congress Spring park and fifteen hundred people of the village will take part assisted by their neighbors of Glens Falls, Ballston and Schuylerville.

### Panama Canal Pictures.

The United States government has recently purchased for the print collection of the library of congress the entire set of lithographs of the Panama canal by Joseph Pennell. This series of drawings was undertaken for The Century in February last, and several of them appear in the August number of that magazine. The historical value of Mr. Pennell's pictures is increased by the fact that with the letting in of the water the picturesqueness of this part of the canal work will be largely obliterated.

### Former Vermonter's Good Work.

Col. Joseph F. Scott, who is state superintendent of prisons in New York, is a Vermonter, having been born in Craftsbury in 1860 and completed his

education at the school at St. Johnsbury. He was deputy superintendent of the Concord, Mass., reformatory from 1885 until 1891 and superintendent from 1891 to 1903.

Nine years ago Colonel Scott became superintendent of the New York reformatory at Elmira, under Governor Dix, and has done much toward making the inmates of the institution worthy citizens when they go back into the world. Many times he has provided means for their start in life from his own funds, as he is possessed of an independent fortune and draws a salary of \$6000 a year as superintendent.

### Summer Session Notes.

Pres. John M. Thomas gave the last of his popular lectures on the Minor Prophets last Monday evening, at the Hemicycle. The subject this week was the "Prophet Jonah," and the lecture was especially well received by the students and friends of the session.

On Tuesday evening Prof. Harlan T. Stetson of Dartmouth college gave an illustrated lecture on "The Astronomy of Today." Professor Stetson proved himself a most instructive and pleasing lecturer, and with his varied collection of slides the audience was highly entertained.

On Tuesday afternoon, August 6, at 3 o'clock, Professor McFarland will give a lecture on the "Montessori Method of Instruction" and explain the use of the Montessori Didactic Apparatus. In the evening Dr. Cunningham will give an illustrated lecture on the "Central Nervous System." The lectures are open to the public.

Professor White has made arrangements for an excursion to Grand View on Saturday. The party will leave Battell cottage at 8 o'clock.

Mrs. Ratti, director of music, is arranging for a public musical at the college, to be given next Wednesday evening. A social hour will follow at which Mrs. Cunningham, Mrs. Payne, Mrs. Bachmann, Miss Hall and Miss Baldwin will be the patronesses.

### Body Mangled in Runaway.

With his body mangled and practically every bone broken, George Bromley of Pawlet was found Friday night his form being firmly wedged in between the spokes of his carriage. Few details of the accident could be learned but it is known that Bromley had been trading in Granville, N. Y., from which place he was returning when his horse became frightened and ran away.

Bromley passed one residence and the men working near the barn heard his cries but all efforts to stop the runaway horse were without success. Shortly after passing the place, the man was seen to sway and fall into the spokes of the fast moving carriage. One arm and leg found their way through the spokes, and the horse ran about a mile before coming to a stop. It was necessary to remove the wheel before the body could be extricated. The man was dead when released. Mr. Bromley, who was 50 years old, was the son of D. W. Bromley, a prominent man of Pawlet. His wife survives.

### A SOUND SAVINGS BANK.

The bulk of the deposit of the Marble Savings Bank, at Rutland, is placed in first mortgages on real estate, mostly farms—and it can be said that in all its years of business since '83 it has never lost a dollar on a poor farm loan.

The safety of each investment made rather than the rate of interest to be derived has been the first thought.

Backed by this careful management at the hands of "directors who direct," this bank carries a reserve fund of over one hundred thousand dollars, which, as the bank has no stockholders, belongs to the depositors, and is only held as a further protection to their interests.

Money received at the Marble Savings Bank before August 6, bears interest from the 1st at 4 per cent. per annum.

For information of any kind, a letter addressed to John N. Woodfin, president, or Ivor S. MacFarlane, treasurer, will receive a prompt and courteous reply. —Rutland Herald.

### TEACHERS' EXAMINATIONS

At Bristol in Town Hall basement; Middlebury in Town Hall basement; Shoreham in Academy building; on Tuesday and Wednesday, August 13 and 14, 1912, from 9:00 to 12:30—1:30 to 5:00. Candidates personally unknown to examiner should bring testimonial of character to forward with papers to Montpelier.

C. A. WILLEY, Bristol,  
A. W. EDDY, Middlebury,  
E. L. EDDY, Shoreham.

Does Strong Light  
AFFECT YOUR EYES?

Does it produce disagreeable symptoms due to dazzling light, such as head pressure, dizziness, headache, or cause you to see spots, or objects to "float"? Examination will probably reveal a condition of nervous exhaustion of the eyes. We make special glasses that subdue the dazzling effects of ultra-violet rays and give you comfortable vision.
